

BACT7507 – Project

Week 2 Lab Activity – Structured Problem Definition & Stakeholder Analysis (3 Hours)

Lab Objectives

- Apply structured problem-solving techniques (5 Whys).
- Refine and finalise problem statement.
- Identify and analyse project stakeholders.
- Conduct feasibility assessment.
- Prepare structured draft content for Assessment 1.

Part 1 – Root Cause Analysis Using 5 Whys (45 minutes)

- Write your current problem statement.
- Ask 'Why?' at least five times.
- Identify the true root cause.
- Rewrite your refined problem statement clearly.

5 Whys Template:

Problem: Student and teachers are finding difficulties in searching books in the campus library and, it's also time consuming and it's hard to manage all book + borrowed book records manually by the receptionist. Also, some borrowed books sometimes never return. Receptionists get trouble while searching for member's information.

Why 1: _Why students & teachers are finding difficulties is finding books_____

Why 2: _Why receptionist is struggling to manage books in library_____

Why 3: _Why receptionist is having hard time to manage keeping borrowed books details_____

Why 4: _Why some borrowed books can't get returned_____

Why 5: _Why receptionist find difficulties in finding members information_____

Part 2 – Stakeholder Identification & Analysis (45 minutes)

- List all stakeholders affected by your project.
- Classify them using Power–Interest grid.
- Explain their role and expectations.
- Describe how you will manage or communicate with them.

Stakeholder Table Template:

Stakeholder | Role | Power Level | Interest Level | Management Strategy

Stakeholder	Role	Power Level	Interest Level	Management Strategy
Receptionist	Managing all records of members and books	High	High	Able to manage books and members and also access to fine
Students	Searching and borrowing books	Low	High	Able to only search and borrow books
Teachers	Searching and borrowing books	Low	High	Able to only search and borrow books plus suggest books
Administrator	Manage staffs and books	High	Low	Can manage all library staff and receptionist and members

Staffs	Helping members to find books plus manage books	Medium	Medium	Only able to check books availability.
Publishers	Providing books based on library needs	Low	Low	Only access to ordered books list

Part 3 – Feasibility & Risk Assessment (45 minutes)

- Technical Feasibility: Do you know the required technologies?
Ans: We need to learn extra 30%, like flask, my sql.
- Time Feasibility: Can it be completed in 12 weeks?
Ans: Yes
- Resource Feasibility: Do you need hosting, tools, paid services?
Ans: No
- Identify at least THREE risks.
- Provide mitigation strategy for each risk.

Risk Template:

Risk 1: ___skill limitation_____ | Mitigation: Learning that skill_____

Risk 2: _____Mismanagement of work responsibility_____ | Mitigation: Need to manage work between team member effectively_____

Risk 3: ___Delay in completion_____ | Mitigation: Need to be consistent

Part 4 – Assessment 1 Draft Preparation (45 minutes)

- Write final problem statement (refined).
- Add short paragraph explaining root cause.

- List stakeholders clearly.
- Summarise feasibility in 1–2 paragraphs.
- Upload draft to GitHub repository (commit with message 'Week 2 Draft').

Final Submission (Upload to Canvas)

- 5 Whys analysis document.
- Stakeholder table.
- Feasibility and risk assessment.
- Updated GitHub screenshot showing new commit.
